

Table of Contents

Code	Title	Page
	Paper Reviewers	
	Editor	
	Foreword	i
	Table Of Contents	iii
	Schedule	vii
P1.1	<i>Activities in TOKYO TECH Center of Excellence Innovative Nuclear Energy System (COE-INES), Hiroshi Sekimoto</i>	1
P1.2	<i>Opportunities, Challenges and Common Design Objectives for Innovative Small and Medium Sized Reactors, Vladimir Kuznetsov</i>	7
P2.1	<i>The Status of Nuclear Energy Program in Indonesia / Hudi Hastowo</i>	17
A1.1	<i>Neutronic Aspect of Subcritical Assembly for Mo-99 Production (SAMOP) Reactor, Topan Setiadipura</i>	23
A1.2	<i>Simulation of Neutron Generating Target Cooling System with Finite Element Method (FEM), Elfrida Saragi , Slamet Santoso, Utaja</i>	27
A1.3	<i>Pattern Recognition of Material Creep and Fatigue used in Nuclear Power Plant, Mike Susmikanti, Antonius Sitompul, Ari Handayani, Suratman, Arya Adhyaksa</i>	31
A1.4	<i>Simultaneous Selection of Beam Directions for Treatment Planning and for Image Reconstruction, R. Widita, L.C. Holloway</i>	37
A2.1	<i>Multistep Runge-Kutta Methods for Solving DAEs, Heru Suhartanto, Kevin Burrage</i>	41
A2.2	<i>Development of Activity Analysis for Surveillance in Nuclear Facilities, RB. Wahyu, Tati R. Mengko, Bambang Pharmasetiawan, Andriyan B. Saksmono, Toto Widyanto</i>	45
A2.3	<i>Development of Anomaly Diagnosis Method using Neuro Expert for PWR Monitoring System, Muhammad Subekti, Kazuhiko Kudo, Kunihiro Nabeshima</i>	53
A2.4	<i>Dynamic Transient Analysis of the Structure Based on the Finite Element with the Normal Mode Method, Utaja, Khairina Ns</i>	65
A3.1	<i>Thermal Performance Analysis of Novel UO₂ Pellet Containing Tungsten Matrix for Pressurized Water Reactor, Suwardi</i>	71
A3.2	<i>Improving Computational Efficiency Using Brute Force Method in Uncertainty/Sensitivity Analysis, M. Hendayun</i>	77
A4.1	<i>Influence To the Calculation Result of Reactor Characteristics by the Simplification of the ADS Analysis System, Shinya ISHIDA, Hiroshi SEKIMOTO, Kenji NISHIHARA, Hiroyuki OIGAWA</i>	83
A4.2	<i>Affect of Reflectors on Criticality Parameters of Homogeneous System of Uranyl Nitrate Solution, Tegas Sutondo</i>	87
A5.1	<i>Improvement of Treatment Planning System at JAEA (JCDS) for Boron Neutron Capture Therapy, H. Kumada, K. Yamamoto, Peng Hong Liem, A. Matsumura and Y. Nakagawa</i>	93
A5.2	<i>A Computation and Database Development for Fast Neutron Activation Analysis, Slamet Santosa, Elin Nuraini</i>	99
B1.1	<i>Status and Prospect of Development of Lead-Alloy-Cooled Fast Reactor, Minoru Takahashi</i>	105
B1.2	<i>The Influence of Mass Flow Rate on Power Fluctuations in A Fluidized Bed Nuclear Reactor: A Space-Dependent Dynamics Perspective, Alexander Agung</i>	113
B1.3	<i>Development of Integrated Simulation Code System of PWR for Education Purpose, Syeilendra Pramuditya, Zaki Su'ud, Abdul Waris</i>	119
B2.1	<i>Recent Research Activities on CANDU Burnup, Hiroshi Sekimoto</i>	125
B2.2	<i>Development of Advanced Nuclear Energy Systems in India, P.D. Krishnani</i>	133

B2.3	<i>Education of Nuclear Reactor Engineering in Project Based Learning, Tadashi Narabayashi, Yoichiro Shimazu</i>	147
B2.4	<i>Neutronic and Natural Circulation Aspect of Thorium Battery (Thobatt), a Long Life Small PWR with (Th,U)O₂ Fuel, Topan Setiadipura, Zaki Su'ud</i>	155
B3.1	<i>An Advanced Energy System Using a Small Fast Reactor as an Energy Source, Yasuyoshi Kato, Y. Muto, Takao Ishizuka, N. Nikitin, M. Utamura</i>	161
B3.2	<i>Feasibility Analysis of Nuclear Energy System for Developing Countries Which can Utilize Natural Uranium/Thorium Efficiently without Embedded Enrichment Plant nor Reprocessing Plants, Zaki Su'ud, Rida Siti Nm</i>	173
B3.3	<i>Long-Term Load Forecasting on the Java-Madura-Bali Electricity System Using Artificial Neural Network Method, Arief Heru Kuncoro, Zuhul, Rinaldy Dalimi</i>	177
B4.1	<i>A Symbiotic System of a Large Fast Breeder Reactor and Small-Sized, Long Life, Thorium Satellite Reactors - General Introduction, Peng Hong Liem, Ismail, Permana Sidik, Naoyuki Takagi, Hiroshi Sekimoto</i>	183
B4.2	<i>A Symbiotic System of a Large Fast Breeder Reactor and Small-Sized, Long Life, Thorium Satellite Reactors – Performance Optimization , Ismail, Liem Peng Hong, Sidik Permana, Naoyuki Takaki, Hiroshi Sekimoto</i>	189
B4.3	<i>Advanced SPINNORs Concept and He Prospect of their Deployment in Remote Area, Zaki Su'ud</i>	199
B4.4	<i>Study of Parallel Burnup Calculation on Multi PC, Imam Taufiq, Zaki Su'ud</i>	209
B4.5	<i>Design Study of Long Life HTGR Using Thorium Cycle (General Characteristics), Ferhat Aziz, Zaki Su'ud, Asril P., Ratu Fenny, Deby M.</i>	213
B5.1	<i>Design Study and Analysis of Pb-Bi Cooled Fast Reactor for Hydrogen Production, Epung Saepul Bahrum, Zaki Su'ud, Abdul Waris, Bambang Ari Wahjoedi</i>	217
B5.2	<i>Study of Thorium Characteristic on Supercritical Water Reactor (SCWR), Bambang Joko Suroto and Zaki Su'ud</i>	221
C1.1	<i>Design Study of Full Scale Accelerator Driven Transmutation System (ADTS), for Transmuting High Level Waste of MA/Pu from PWR Spent Fuel., Marsodi, K. Nishihara, Zaki. Su'ud</i>	225
C1.2	<i>Breeding Capability of Uranium and Thorium Fuel Cycles for Water Cooled Reactors, Sidik Permana, Naoyuki Takaki, Hiroshi Sekimoto</i>	233
C2.1	<i>Studies of Advanced Fuel Cycles in Indian PHWRs and AHWR, P.D. Krishnani, Baltej Singh, Umasankari Kannan, R. Srivenkatesan</i>	239
C2.2	<i>Scenario for Thorium Fuel Cycle with Free ²³³U in BWR, Abdul Waris, W. Nawangsary, S. Pramuditya, R. Kurniadi</i>	245
C2.3	<i>Extended Wood-Saxon Potential for Determination of Fission Cross-Section of ²³²Th with Neutron Energy Range 1-200 MEV, Rizal Kurniadi, Abdul Waris, Suwoto</i>	249
C2.4	<i>High Level Waste Confining in BWR with Thorium Fuel, Abdul Waris, R. Kurniadi, Novitrian, Z. Su'ud</i>	253
C3.1	<i>Design Study of Long Life Pb-Bi Cooled Reactors with Natural Uranium as Fuel Cycle Input Using Radial Fuel Shuffling Strategy, Rida Siti NM, Zaki Su'ud</i>	257
C3.2	<i>Design Study of the HTTR with Lead – Bismuth Coolant Use Uranium and Thorium Fuel, Deby Mardiansah , Ratu Fenny Muldiani, Zaki Su'ud</i>	263
C3.3	<i>Development of Three Dimensional Accident Analysis Code for Pb-Bi Cooled Tank Type Fast Reactors, Yanti Yulianti, Zaki Su'ud</i>	269
C4.1	<i>Application of Small Reactor 4S, Akio Minato</i>	275
C4.2	<i>Co-Evolution of Nuclear Technology and Society - Nuclear Social Responsibility and Education, Naoki YAMANO</i>	283
C4.3	<i>Nuclear Education System in Indonesia for Improving Public Acceptance, Ekki Kurniawan</i>	289
C4.4	<i>The Role of Nuclear Engineering Education in University Level to Support the First Nuclear Power Plant in Indonesia: a Lesson from Korea, C. Hudaya, U.C. Lee</i>	295

C5.1	<i>Calculation of Energy Dependent Level Density Parameter Using Extended Wood-Saxon Potential, Rizal Kurniadi, Abdul Waris, and Yudha Satya Perkasa</i>	301
C5.2	<i>Calculation of Isotopic Fission-Yield of ^{233}U and ^{232}Th for Fast Energy Spectrum, A. Waris, R. Kurniadi, Y. S. Perkasa, S. Pramuditya, Suwoto</i>	305
C5.3	<i>Shell Correction with Strutinskys Model, Adam Al Fatih</i>	309
C5.4	<i>Single Particle Level Density Calculation Using Extended Wood Saxon Potential, Rizal Kurniadi, Abdul Waris, Yudha. S. Perkasa</i>	313
D1.1	<i>The Prospect of Neutron Scattering in the 21st Century: A Powerful Tool for Materials Research, E.Kartini</i>	317
D1.2	<i>Corrosion Resistance of Alloy-Sputtering-Coated Steels and High Chromium Steels in Pb-Bi at Transient Temperature Conditions, Abu Khalid Rivai, Minoru Takahashi</i>	325
D1.3	<i>New Synthesis Method of the Mg_2Ni Compound by Using Mechanical Alloying for Hydrogen Storage, Hadi Suwarno, Wisnu Ari Adi, Andon Insani</i>	333
D2.1	<i>Structural Model of Superionic Conducting Glasses by a Reverse Monte Carlo Analysis, Shane Kennedy, Rhet Magaraggia, Evvy Kartini</i>	339
D2.2	<i>Application of Euler-Lagrange Method in Spatial Estimation of Pollutant in Advection Dominant Condition, Sunarko, Zaki Su'ud, Abdul Waris</i>	345
D2.3	<i>Influence of β-Quenching on the Microstructure and Microhardness of Zr4-Nb Alloys., Djoko Hadi Prajitno</i>	351
D3.1	<i>State Responsibility for Nuclear Activities in Indonesia, Yanti Fristikawati</i>	355
D3.2	<i>Simulation to Attain Optimal Composition of Power Plant Technology in Java-Madura-Bali up to Year of 2026, Ronald Winardi, PY.Topo Suprihadi, Sudi Ariyanto</i>	359
D3.3	<i>Optimum Solution Expectation on Sumatra Electricity Expansion Planning Beyond 2030 Using WASP-IV Package, Edwaren Liun</i>	367
D3.4	<i>Load Pattern and the Implication in the Electricity Expansion Planning with Nuclear Option, Suparman, Zuhail, D. Rinaldy</i>	373
D3.5	<i>Environmental Impacts Assessment of Java's Electricity Generation Using SimPacts Model, Edwaren Liun, Arief H. Kuncoro, Edi Sartono</i>	379
D4.1	<i>Study on Advanced Micro-Disk Gas Turbine Using Hydrogen Fuel Produced by Very High Temperature Nuclear Reactor, Sri Sudadiyo</i>	385
D5.1	<i>Simulation of Radioactive Release in Muria Peninsula Using Hysplit Model, Sudjatmi K. A, Teuku Alfa</i>	391
D5.2	<i>Corrosion Study of Steels in Liquid Lead-Bismuth Cooled Nuclear Reactors by Computer Simulation, Alan Maulana, Zaki Su'ud, Hermawan K.D, Khairurrijal</i>	397
D5.3	<i>Development of Cell Homogenization Code Using General Geometry Approach, Mohamad Ali Shafii, Zaki Su'ud</i>	403
D5.4	<i>Design Study on Medium Size 700 MWt Lead-Bismuth Cooled Fast Reactor (LFR) with Metallic Fuel (U-Pu-10Zr), Andri Wahyudi, Zaki Su'ud</i>	407
	International Advisory Board	409
	Organizing Committee	409
	List of Participants	411
